PROJECTS

- **Crime Reporter – Android App**
  Created this application for a final year project for my Diploma final semester in Information Technology in which users can register in this app and can add complaints like FIR, Missing, Live Crime, Cyber Crime and can send it to police. After that police will accept that report and start working on that report asap, police can also track the live location of that particular user.

- **Inventory Management System – Website Development**
  Developed this Website for Internship Project in Python as well as for Second Year Micro Project.

- **Health Care – Android App**
  Developed this Application for Third Year Micro Project. It used to Buy Online Medicine.

- **Doctor Appointment And NGO – Android App**
  Created this application for a final year project for my B.E final semester in Information Technology for booking doctor appointment online by making online payment and buy online medicine by online payment and donate some medicine and donation to NGO by online payment.

- **Bally Parivaar - Android App**
  Developed an online pen shopping application for one of my clients in which users can just order pens by selecting quantity and by making online payment. This app is currently live in the market, and also it helps users to order pens or stationary materials sitting at home.
